To Whom It May Concern:

Thank you for your inquiry concerning the recycled content of our PVC conduit products. LEED Version 4 is the current version of LEED. Atkore Plastic Pipe & Conduit consists of Allied Tube & Conduit, Heritage Plastics, and American Pipe and Plastics.

LEED MR Credit: Construction Waste Management

PVC is fully recyclable. Therefore, scrap produced during construction is diverted for landfills.

LEED MR Credit: Recycled Content and Regional Materials
According to LEED requirements, mechanical, electrical and plumbing components are included in the calculations for recycled content.

PVC conduit is an electrical component. On average the raw materials used to manufacture our PVC conduit will contain 13% recycled content. There is no post-consumer material used in our PVC conduit.

On average factory fabricated elbows, sweeps, and fittings will contain 13-40% recycled content based upon manufacturing location. There is no post-consumer material used in our PVC conduit.

Molded PVC fittings do not contain recycled material.

For your information, our PVC conduit manufacturing plants are located in Thomasville, GA; Eugene, OR; Louisville, KY; Milford, UT; Tampa, FL; Weatherford, TX and Binghamton, NY. We are unable to provide point of extraction for raw materials.

LEED MR Credit: Material Ingredients Optimization

Atkore PVC pipe is compliant with the European Union's REACH program. REACH certifications are available upon request.
